

# BUSINESS

## Engage – Simplifying the Quote Experience

Screenshots of before and after for Site to Site, Site to Multisite and VPN/MIA products

Document Owner: Engage Product Owner

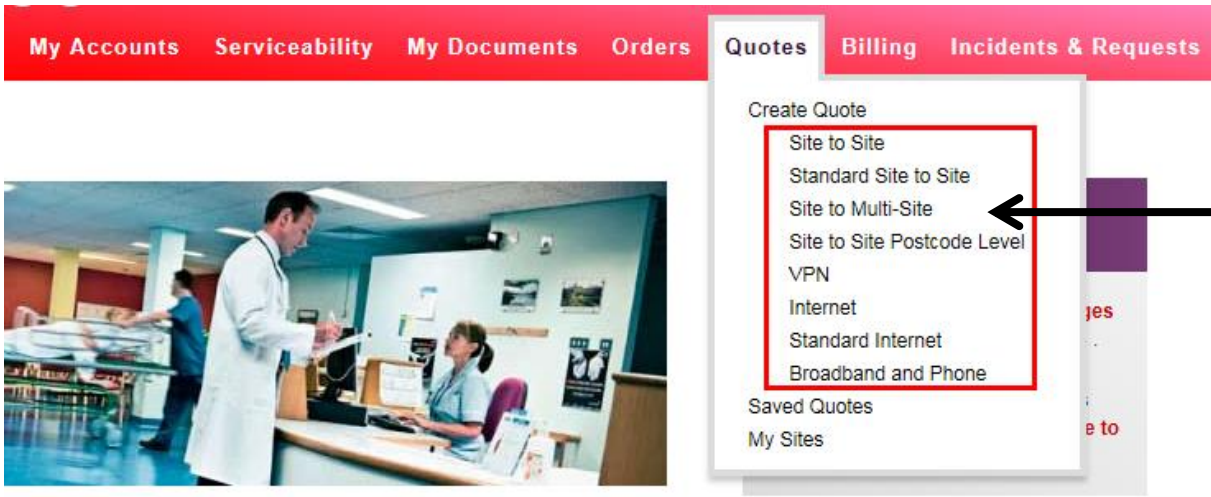

Date: 16<sup>th</sup> December 2016

Version: 1.0

PUBLIC

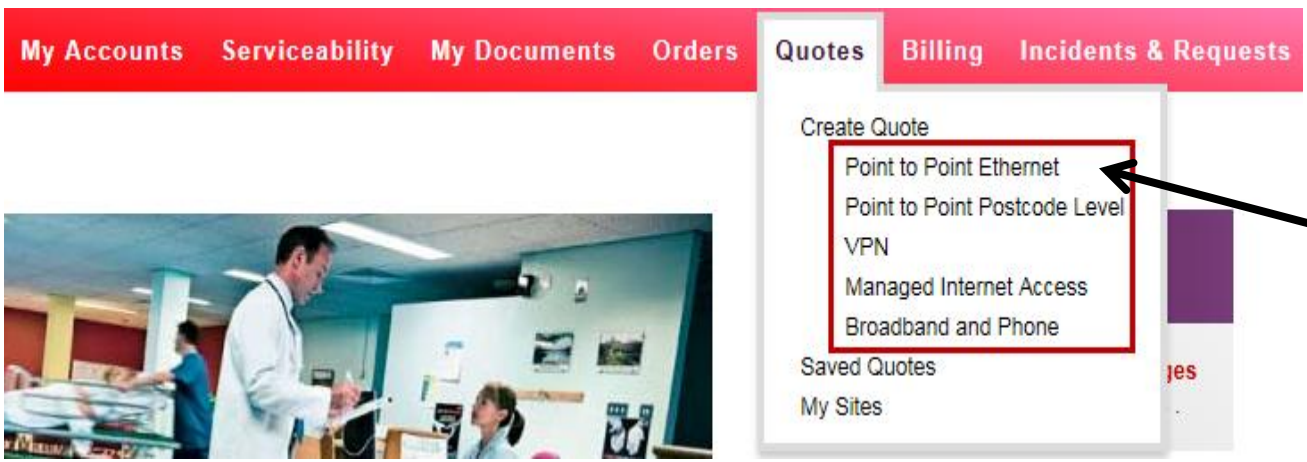

# Site to Site Quote Comparisons

# Home screen Before...

**Quote menu:** the quote menu had many different options to select for our Site to Site and Site to Multisite Ethernet products making it confusing for new and existing users.

# Home Screen After...

**Quote menu:** we've made this clearer for you and simplified the options that appear within the drop down menu shown on screen. "Site to Site" and "Site to Multisite" have been consolidated into one and re-named "Point to Point Ethernet".

## Sites Tab Before...

**Site selection:** previously, the first screen within the Quote section of Engage contained a mix of search and filter boxes, making it confusing and time consuming to find sites.

## Sites Tab After...

**Site selection:** your POI (Point of Interconnect) sites will be automatically displayed, as well as any generic Telehotel sites that may be relevant for your organisation.

# Serviceability Tab Before...

**Default configurations:** we're making it easier for you to configure both your A and B End sites on the same screen. Engage will now include the most frequently used configurations – all you need to do is select them from the menu, saving you time and the effort of having to enter the information from scratch each time. You'll also be able to generate custom configurations too.
